# Dustin Nguyen

Graduated from Wake Technical Community College with an
Associate's Degree in Web Development

Cary

## Summary

Web developer from Cary, North Carolina with an Associate's
Degree in Web Development.

## Experience

**Team Projects**
2 months

**Rooms and More (Java)**
October 2020 - November 2020 (2 months)

A Java based application created in Eclipse to aid users in building rooms,
classrooms, and elevators. Users are able to input information to return useful
data for building. Users may use this app to quickly calculate the exact area
and perimeter of the space as well as the capacity for that spot.

**StringSet Project (Java)**
October 2020 - November 2020 (2 months)

A Java based application emphasized on the use of ArrayList to make the
original StringSet application more efficient. Users are able to input information
into an array and then allowed to extract the information in the array in different
methods. Users can pull the size of the array to find out how much information
was entered. Users may also return the amount of characters entered into the
array. Users are also able to search for information; the application displays an
option for the user to search for specific words that may have been entered.

**Project**
4 months

**Resume Builder/Generator**
April 2019 - May 2019 (2 months)

- Created a page for users to build their resumes based on their inputs
- Uses JavaScript to receive the values entered in by the users to output a
resume

- Allows users to view or print the resume after the resume is displayed in print view

Mobile Application Design
February 2019 - March 2019 (2 months)

- Designed a mobile application design using Adobe XD
- Created a prototype for a custom application that dealt with helping users find healthier recipes
- Animated the mobile application design to create a more realistic prototype

Project
4 months

Redesign of Stokes County website
March 2018 - April 2018 (2 months)

- Redesign the Stokes County website via HTML5, CSS, and JavaScript to further improve user experience (UX) and user interface (UI)
- Utilized Bootstrap to make the Stokes County website a responsive design.
- Designed the new responsive website to display appropriately on mobile devices of several different screen sizes

E-Portfolio
February 2018 - March 2018 (2 months)

- Created an E-Portfolio utilizing HTML5 and CSS
- Used CSS Bootstrap for responsive design

Redesign of Biltmore Estate's website
January 2018 - February 2018 (2 months)

- Simple redesign of Biltmore Estate's website via HTML5 and CSS
- Convert the redesigned website to also be accessible as a mobile web app
